

OCCUPATIONAL DRUG TESTING

Madison Core Laboratories (MCL) offers a comprehensive toxicology test menu with screening and confirmation capabilities for new hire drug screening and employee drug testing.

TOXICOLOGY TESTING

MCL utilizes high-complexity urine toxicology testing platforms for screening and confirmation drug testing. Urine is the preferred sample type due to ease of collection. Concentrations of drugs and metabolites also tend to be higher in urine, offering a longer detection window than other collection methods. With one urine sample, MCL can provide both screening and confirmation toxicology results for multiple drug classes.

Each sample is tested for validity utilizing temperature (at collection), pH, specific gravity, and creatinine to ensure all tested samples have no adulteration.

COLLECTION AND TESTING PROCESS

All urine samples are collected, processed, transported, and tested using a safeguarded chain of custody process that ensures sample integrity is maintained throughout the entire testing process.

Samples may be collected by a MCL mobile collector at your location or at one of MCL's Patient Service Centers (PSC). Our PSCs offer a convenient walk-in option for sample collection.

The samples are then processed using chain of custody procedures, transported using a certified courier, and tested in our high complexity toxicology laboratory. Certain results are reviewed by a Medical Review Officer. Results are conveniently reported directly to the employer with provided counseling from the MCL Medical Review Officer.

DRUG SCREEN OPTIONS

- ▶ **10 Drug Panel Screen with Confirmation**
 - Includes: Amphetamines, Barbiturates, Benzodiazepines, Buprenorphine, Cocaine, Methadone, Opiates, Oxycodone, Phencyclidine (PCP), THC
- ▶ **5 Drug Panel Screen with Confirmation**
 - Includes: Amphetamines, Cocaine, Opiates, Phencyclidine (PCP), THC
- ▶ **2 Drug Panel Screen with Confirmation**
 - Includes: Cocaine and THC

BENEFITS

A healthy, productive workforce begins with a drug-free workplace. Employers can utilize our toxicology testing services to manage:

- Pre-employment screening
- Reasonable suspicion screening
- Post-accident screening
- Follow-up testing
- Return to duty screening

Additional Services

- Point-of-care collection cups
- Web-based portal for easy access for reviewing results
- Multiple Patient Service Center locations for convenient walk-in sample collection
- Mobile sample collection options for coordination at your facility
- Medical Review Officer and Clinical and Technical Consultants available
